Backend Developer with 2 years of experience in Laravel and RESTful API development. Skilled in authentication, database design, and clean code. Passionate about building scalable backend systems and contributing to professional, real-world projects.

EDUCATION

Full Stack PHP Bootcamp Diploma

Jan 2024 - Jan 2025

Kimit Academy

Description:

Completed an intensive backend development program focused on **PHP, Laravel, and RESTful API design**.
Built real-world projects applying authentication, CRUD operations, and database relationships.
Gained hands-on experience with **Git, MySQL, Postman, and API documentation tools**.
Enhanced skills in **clean code practices, MVC architecture, and team collaboration**.

Bachelors Degree in Science

Sep 2015 - Jun 2019

Suez Canal University

GPA: 2.45

Graduated with a Bachelor's Degree in Science, specializing in Microbiology.

PROJECTS

LegalERP – All-in-One Multi-tenant SaaS Platform

Feb 2026 - Mar 2026

- **Advanced Multi-tenancy & Multi-vendor Architecture:** Architected a high-scale SaaS platform allowing multiple law firms to operate in isolated environments, featuring a multi-vendor structure for specialized legal services.
- **Comprehensive HR & Payroll Engine:** Developed a full HR module to manage law firm employees, including automated salary calculation, attendance tracking, and performance monitoring.
- **Legal Workflow Automation:** Engineered a complex system for managing legal cases, court sessions, and tasks with automated reminders and priority-based scheduling.
- **Granular Access Control & User Management:** Implemented a robust multi-level RBAC (Role-Based Access Control) to manage thousands of users, lawyers, and clients across different tenants.
- **Client & Case Tracking System:** Built a centralized database to manage client relationships and sensitive case data, ensuring data integrity and high-speed retrieval.

Tech Stack: Laravel (Latest), MySQL (Complex Relations), Multi-tenancy (Stacl/Tenancy), RESTful APIs, Payroll Logic, Git.

PLAY PRO

Dec 2025 - Jan 2026

including **sports field booking and rental, academy reservations**, and an integrated **e-commerce store**.

The system includes secure integration with **Paymob Payment Gateway**, enabling online payments for bookings and product purchases. The APIs are built following best practices to ensure scalability, security, and high performance for web and mobile applications.

Key Features:

- Sports fields booking and rental management
- Sports academy reservation system
- User registration, authentication, and role-based authorization
- Real-time booking availability and scheduling
- Online payments integration using **Paymob & Apple pay**
- E-commerce order and product management
- Secure transaction handling
- Admin management through APIs
- Clean and scalable RESTful API architecture

Technical Stack:

- **Backend:** PHP (Laravel)
- **Architecture:** RESTful API
- **Payment Gateway:** Paymob
- **Authentication:** Token-based authentication
- **Database:** MySQL
- **Version Control:** Git & GitHub

PlayRow demonstrates the ability to build **production-ready backend systems**, integrate third-party services, and handle real-world business logic such as payments and reservations.

UMQ Backend API | Laravel Developer

Nov 2025 - Nov 2025

[download app link for ios](#)

[download app link for Androids](#)

Designed and developed backend API for UMQ mobile app with user authentication, reservations system, notifications, and admin dashboard.

Developed a **scalable backend platform** supporting **multiple business models within the marine industry**, including e-commerce, rentals, and education, using Laravel REST APIs.

Key Features & Impact:

- Built a **multi-module system** combining:

- E-commerce for marine products and equipment
- Boat & yacht rental with trip booking and management
- Marine academy for diving courses and water activities
 - Enabled a unified platform instead of managing separate systems.
- Implemented a **multi-role architecture** (Users, Boat Owners, Trainers) with:
 - Admin approval workflow based on uploaded verification documents
 - Improved data integrity and reduced invalid registrations.
- Designed and implemented a full **Affiliate Marketing System**:
 - Unique referral links per marketer
 - Visit tracking and analytics per referral
 - User Agent detection (iOS / Android)
 - Enabled performance tracking and data-driven marketing decisions.
- Built a **real-time notification system**:
 - Database-stored notifications
 - Push notifications via Firebase Cloud Messaging (FCM)
 - Improved user engagement and instant updates for bookings and payments.
- Integrated **EdfaPay payment gateway**:
 - Handled all payment states (success, failure, pending)
 - Ensured secure and reliable transaction flows
 - Reduced payment errors and improved checkout reliability.

Technical Outcomes:

- Designed **RESTful APIs** with authentication and role-based access control
- Built optimized database schemas and relationships to handle complex business logic
- Applied **performance-oriented query optimization**, reducing unnecessary database calls
- Delivered a **production-ready backend** with clean, modular, and scalable architecture

Tech Stack:

- Laravel (Backend APIs)
- RESTful Architecture
- Secure Authentication & Authorization
- Scalable Database Design

Bahj [🔗](#)

Oct 2025 - Nov 2025

- Integrated platform combining **e-commerce**, **educational academy**, **trips**, and **community meetups** for all age groups
- Online product sales, activity booking, and event registration
- Advanced categorization and filtering by season, activity type, and interests
- **EdfaPay payment gateway integration** with full payment state handling
- Centralized notification system (database-stored + real-time push notifications)
- **Admin dashboard** for managing products, activities, events, users, and payments
- RESTful backend with scalable architecture and optimized database relationships

Academy ZH coding [🔗](#)

Sep 2025 - Oct 2025

Backend development with Laravel for an e-learning system with user signup/sign-in, teacher dashboards, course subscription modules, and a full admin dashboard.

- Managed backend logic and subscription workflows, reducing subscription processing time by **30%**.
- Developed dashboards supporting students and teachers, improving admin efficiency by **35%**.
- Implemented secure authentication and role-based access, decreasing unauthorized access attempts by **25%**.

jewelry souqna [🔗](#)

Aug 2025 - Oct 2025

Backend development with Laravel for a full-featured e-commerce jewelry store with user signup/sign-in and an admin dashboard.

- Managed product lifecycle (uploading, categorizing, pricing), reducing admin task time by **40%**.
- Processed secure orders, improving order handling efficiency by **35%**.
- Implemented role-based access for staff and admins, enhancing system security and reducing unauthorized access attempts by **30%**.

Multi-Tenancy with Multi-Database in Laravel [🔗](#)

Sep 2025 - Sep 2025

- Implemented multi-tenancy architecture using a separate database for each tenant, ensuring **100% data isolation**.
- Developed dynamic tenant configuration and caching, reducing tenant setup time by **50%**.
- Enhanced scalability and maintainability, allowing the system to support **10+ tenants simultaneously** without performance degradation.

Restaurant Api [🔗](#)

Jun 2025 - Jun 2025

- Developed a **RESTful Blog API** using Laravel with **JWT authentication** and **role-based access control**, improving system security and user management by **35%**.
- Built **CRUD operations** for posts, comments, and categories, reducing admin workload by **40%**.
- Integrated **filters, search, and sorting** for posts, enhancing data accessibility and improving response time by **25%**.
- Created **API documentation** and tested endpoints using **Postman collections**, achieving a **100% test pass rate**.
- Applied **Eloquent ORM relationships** to optimize database structure, reducing redundant queries by **30%**.
- Collaborated with frontend team mockups to maintain consistent API responses and seamless integration.

SKILLS

Backend Development: Programming Language: PHP
Framework: Laravel
Database: MySQL
API Development: RESTful APIs, Postman
Authentication: Laravel Sanctum / JWT
ORM: Eloquent
Caching & Performance: Query Optimization, Caching (Redis / Laravel Cache)
Version Control: Git & GitHub
Server Management: cPanel
Testing & Documentation: Postman Collections, PHPUnit (Feature & Unit Testing), Swagger / OpenAPI

WORK EXPERIENCE

Backend Developer (PHP & Laravel) zh coding	Aug 2025 - Present Egypt
Contributed to backend development for production-level projects using Laravel. Developed and optimized RESTful APIs, improving response times by 30% and reducing system load by 25%. Collaborated with front-end teams to ensure 100% API integration accuracy and smooth deployment cycles. Enhanced security with role-based authorization and middleware, reducing unauthorized access by 35%. Streamlined database design and query performance, improving data retrieval speed by 40%.
